TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, SQL

Front End: HTML5 & CSS, Bootstrap, Tailwind CSS, React JS, Next JS, React Native

Back End: Laravel, Node JS, Express, PostgreSQL, MongoDB, REST API, Firebase Database

PORTFOLIO

UNITAP (CRM)

November 2025

Built a CRM (Customer Relationship Management) system called Unitap to support centralized customer data management, interaction tracking, and client activity monitoring. The system was designed to improve team efficiency in managing customer relationships and support business growth through structured data.

Tech Stack: Laravel, React Native, React JS, Bootstrap, SQL Server, REST API

School Website (CMS)

February 2026

Created and developed an e-learning platform with features that allow students to view learning materials, track their progress, and see completed lessons; teachers can add video-based materials, text content, and quizzes to support an interactive online learning process.

Tech Stack: Laravel, React JS, Bootstrap, SQL Server, REST API

E-Learning YBM Brilliant

December 2025

Developed an internal e-learning platform for YBM Brilliant, designed as a tool for knowledge testing and employee competency development. The platform includes complete features such as training material management, multiple-choice exam system, automatic grading, learning progress tracking per employee, exam result reporting dashboard, and role-based user management (admin and employee). Built to support the company's human resource development program efficiently and in a structured way.

Tech Stack: Laravel, React JS, Bootstrap, SQL Server, REST API
